Toyo Tec Building Service Co., Ltd. protecting people, cities, and future

Realization of secure and comfortable society

As a core company of Toyo Tec Group, we have worked to provide appropriate and high-quality building management service to meet customer needs based on the group management philosophy “contribution to realizing secure and comfortable society.”

We have obtained the ISO 41001 facility management certification (the fourth case in Japan) and introduced the internal control reporting system (J-SOX) to ensure the appropriateness of the listed company level.

Recently, we merged two building maintenance companies in the Group that have competitive advantages in the cleaning industry and could greatly strengthen the business management system.

In the building maintenance industry, shortage of cleaning staff is one of the most serious management challenges. We have established a system that can cover the management of residential buildings, such as apartment buildings, office buildings and college campuses. If maintenance and security services are requested, we can ensure a higher security level, and you can trust us to do cleaning work in offices with important documents.

We can offer one-stop services for all operations concerning buildings including machine/manned security, cleaning work, equipment management work, construction work, property management and real estate brokerage.

We have newly established Kobe Branch, so that we can completely cover the Kinki area, and expanded the business management system in the Tokyo and Chukyo areas.

We, a general building management company, will contribute to ensuring the safety and security of the building owners and users, improving and maintaining the value of buildings and realizing a safe and comfortable society.

We look forward to your continued patronage

April 2023

protecting people, cities and future

 **Toyo Tec Group**
Toyo Tec Building Service Co., Ltd.

Toshihiro Maeba, President

Playing a central role in general building management by Toyo Tec Group

For further satisfaction

We offer one-stop services for building maintenance, security measures and renewal work to create safe and secure environment for our customers.

For further challenge

Slogan

- We will improve the building owners' and users' satisfaction with security and safety and maintain the high value of their buildings for a long period of time.

Vision

- We consider a change is a chance and intend to grow and develop while autonomously improving and evolving.

Action agenda

- We are aiming at the most trusted partner of our customers based on "quality first."
- We try to act honestly in a transparent manner.
- We accept diversity and try to create pleasant work environment.

We started the activities to obtain the certification of **ISO 41001: 2018** for facility management system, went through the ISO audit from February 7 to 10, 2023, and obtained the certification in the certification registration judging committee on March 13, 2023.

We became the fourth company in Japan to obtain the certification.

We totally support our customers in all phases of building maintenance.

We offer comprehensive one-stop services from daily cleaning to equipment management to maintain comfortable, secure and safe environment for the customers.

Daily cleaning

We provide clean spaces through routine cleaning. We can offer more comfortable environment by cleaning common use spaces, such as restrooms, entrances and office spaces. We carefully clean the buildings not only to keep them clean, but also to protect them and improve the durability to extend their useful life.

Periodic cleaning

The periodic cleaning is performed every one to 12 months according to the schedule to clean the areas not accessible during daily cleaning. We offer the most suitable cleaning method according to the degree of staining and the budget. To maintain and provide clean and comfortable environment, thoroughly trained staff will carefully clean the buildings using the latest equipment and appropriate methods.

Glass cleaning

The cleaning protects the buildings from damage, maintains the windows and sashes clean and prevent deterioration. Areas in high places will be cleaned by professional cleaners acquainted with safety procedures.

Equipment management, inspection and repair

(Instruments, fire protection equipment functions, air conditioning system maintenance and elevator maintenance)

We are engaged in inspections including legal inspections of fire protection equipment and all operations for building equipment replacement and repair. We totally manage the customers' buildings, so we can contribute towards maintenance cost reduction and offer detailed services.

Environmental hygiene management

(Air quality measurement, protection from insects and rodents, drinking water management, water tank cleaning and general waste disposal)

To protect safe and comfortable environment, we scientifically diagnose and analyze even invisible parts for thorough hygiene management.

Security

(manned guarding, automatic security and installation of security cameras)

Security experts are standing by in the buildings and observe the operation conditions of the equipment through the monitoring panels. They are engaged in crime prevention, fire protection and patrol activities and make the rounds to realize highly reliable security management.

Planting

Planting management for creating a comfortable environment is essential for building management. Planted trees and flowers must be maintained by persons.

We can handle the management in all seasons, including pruning, chemical spraying and fertilizing.

Property management business (PM business)

Condominium/building management

We help you to protect your assets. We totally support building owners and association boards in their operations to ensure the well-being.

- Assistance for management of general meeting and board of directors
- Advice about various checks and inspections, reports and notifications
- Advice about budget planning and report of receipts and expenditures
- Support in making improvement project plans and placing orders for construction works
- Outsourcing services for association boards' operations for equipment repair and management
- Tenant management services (rent management, etc.)

Real estate brokerage business

Real estate brokerage (consulting, request to sell, contract, delivery, etc.)

We can offer proposals that meet demanding requirements of corporations, for example, selling real estate to an appropriate party in a short period of time on satisfactory terms without making public the purchase and sale of the real estate.

For investment and business Consulting effective in asset formation

For buyers Daily updating! Desired information is retrieved and presented.

For sellers Appropriate advice based on great deal of knowledge and experience

Consultation about selling
Determination of sales value
Request for sales activities and mediation contract
Start of sales activities
Determination of buyer
Explanation of important matters and conclusion of sales contract
Delivery, payment and receipt of remaining amount and ownership transfer

Construction

Managers who have special knowledge of renovation, equipment repair and construction manage all construction processes and protect the clients' interests in the clients' position.

Others

Call center

We perform call center operations for your staff for the purpose of providing your customers with sincere services. The call center offers a 24-hour service for receiving messages, inquiries, consultations, requests for repair, etc. from your customers and communicating with parties designated by you. Use the center to improve the services and reduce the working hours of your employees and the cost.

Approach to reform of working practices

We are actively engaged in creating a pleasant work environment so that men and women can balance work and family life. As part of the approach, we started working to obtain the certification “Osaka City Leading Company in Women’s Participation,” and we were certified on March 1, 2021 and received the certification mark.

This certification mark can be used by companies that have been recognized by Osaka City as those that are actively engaged in promoting the appointment of women and improving working conditions for women.

For the future

We are addressing social challenges to find solutions through our business.

SUSTAINABLE DEVELOPMENT GOALS

Expand profits by the high quality.

Fostering a corporate culture that values learning culture

Proportion of women in management position: 10%

Creating a healthy and lively workplace through short-time promotion

50% reduction in paper consumption and 20% reduction in CO2 emissions due to gasoline and electricity consumption

Organization chart in 2023

Acquisition of ISO 41001 certification

ISO 41001 is an international standard for facility management established in 2018. The standard is intended to create comfortable and attractive buildings for owners and tenant users and realize energy saving. We consider the acquisition of the certification can accelerate progress toward SDGs.

When restarting our company on April 1, 2022 after merging four companies and changing the company name, we continued to ensure the appropriateness of internal control of the listed company level and established a management system based on the concept of facility management required by ISO 41001.

On March 13, 2023, JACO decided to give the certification to us as the fourth case in Japan. However, we are at the starting line and intend to continue the improvement activities based on the PDCA cycle to provide higher quality services.

What is facility management?

Management activities of companies, organizations, etc. to comprehensively plan, manage and utilize their facilities and environment for their organizational activities

Keep watching the situation.
